

STALLION CLASSIFICATION FORM

Sportaloosa International welcomes the breeding classification of outstanding individuals that are both worthy to breed and capable of improving the Sportaloosa. Breeding stallions must be clear of hereditary defects and must exhibit structural strength and soundness and a tractable nature.

Please have this form completed and signed by a practising veterinarian, who must also sign the reverse of a photo of the stallion to be classified. Stallions are eligible for upgrade to classified breeding stallions from 1 August of the year in which they turn 2.

Please complete all fields in this form.
